

Wrap Skiing Time Around the Dartfish Technology Workshop in Park City, UT April 18-20, 2008

Dartfish USA has once again partnered with **Visual Sports Technology** to offer this 2 1/2 day course, which provides the knowledge and hands-on experience needed to efficiently integrate video analysis into your daily routine.

The workshop will be held in Park City, Utah, home of the Sundance Film Festival and the 2002 Winter Olympic Games. The Canyons Resort, host of the Today Show during the Olympics, will serve as the training headquarters. Bring your gear and experience some awesome spring skiing at one of the premier destinations in the country.

No prior Dartfish experience is required to attend this session. This training will also serve as a **DARTFISH VIDEO COACH certification**, and is appropriate for all users of Dartfish software. This training will offer thorough and detailed coverage of every module of Dartfish software. All attendees should be using Dartfish version 4.0 or higher.

Learn how to import and categorize video, synchronize video clips, superimpose videos, use basic drawing tools, create key positions, share your analysis via email and disc, and generate revenue using Dartfish MediaBooks! This session will also focus on using the advanced features of the Dartfish Software, including: In-The-Action tools such as "Live Delay", and "Automatic Capture" - Analyzer Tools such as "Auto-Tracking" - SimulCam™ and StroMotion™.

We will also develop a simple understanding of what the Tagging module is used for and then to progress to create a video index that can be searched and the results of which can be presented to or exported to CD. In addition to these skills, you will learn how to modify tagging panels according to your needs.

Wrap Skiing Time Around the Dartfish Technology Workshop in Park City, UT April 18-20, 2008
