

WHAT'S NEW ON DARTFISH.TV?

JUNE '09
RELEASE

Accomplish more with the new dartfish.tv features!
Share, learn, comment, organise your time more efficiently than ever before. Read on!

INCREASE ONLINE EDITING Online editing takes on a new dimension!

With new options and features for both online authoring and online commenting, you are free to manage your video content as you wish.

ONLINE AUTHORIZING

Running out of time? Lacking inspiration? Looking for a contribution from your peers? Online authoring delivers! Split your video editing in stages, be flexible in your time management, publish your work-in-progress on your channel

on dartfish.tv and revert to it later... **to finish enriching your videos directly online!**

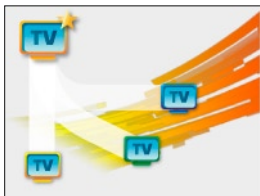

Someone else might have more time than you, or, simply, you would like to have someone else's input. No problem, another person can take over the project and continue the enrichment where you left off, online of course! The result: great teamwork! The online authoring options are vast for subscribers with an "admin" or "moderator" role.

ONLINE COMMENTING

Thanks to online commenting, users can really contribute to a project and express themselves. The result: a closer collaboration!

Registered users can contribute to another person's work by adding their own personal comments to an existing or a new key position. Online commenting extends editing beyond simply describing an aspect of a game or a process, as users can engage in a discussion and share ideas and opinions. As the comments and a video are synchronized, the relevant section on a video or in the "comments" tab will be displayed when you click on it.

EXTEND SHARING WITH CONTENT SYNDICATION

Personal training is made easier! The new data syndication process is the answer to making specific content from your Premium Channel readily available to a User Channel. Select one or more collections from your Premium Channel and syndicate them, provide them, to one or more subscribers in one easy step. The source Premium Channel keeps the full rights on the content. The result: Instantly reach your target audience and generate interest in and traffic to your channel.

MANAGE YOUR VIDEO ATTACHMENTS ONLINE

You can now add / delete attachments (PDF, MS Word, etc...) to your videos directly in the "attachments" tab in the web player.

CREATE A PERSONAL COLLECTION AUTOMATICALLY

You can create a personal collection automatically for each of your subscribers when you create / add them to your channel.

MANAGE LARGE NUMBERS OF COLLECTIONS

The collection management has been modified to accommodate for a large number of collections.

DECIDE IF A VIDEO CAN BE EMBEDDED

We've added a new collection property, which allows you to decide if the content of a collection can be embedded.

ADD LINKS TO WEB RESOURCES

You can add web links in your comments or descriptions to enrich your videos with external online resources.

FOR A CLEAR STEP-BY-STEP VISUAL DESCRIPTION OF THESE NEW FEATURES, WATCH OUR ONLINE TUTORIAL!
