

WHAT'S NEW ON DARTFISH.TV?

JANUARY '09
RELEASE

Dartfish.tv is constantly evolving to respond to your needs and create a highly responsive working environment. Our video casting platform offers many new features to facilitate your tasks and ensure that you get the most out of your channel. Take a look at the new features of dartfish.tv!

BETTER VIEWING EXPERIENCE

Dartfish web player has been migrated to Silverlight 2.0 and redesigned for improved usability. Access different sections of your videos quickly and easily: key positions, game plays, game periods... Select a position on a long video and watch it directly from that point. You won't have to wait until the

whole video is downloaded before starting to play a particular section.

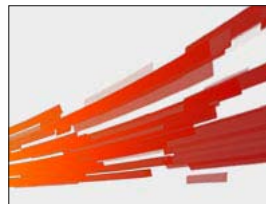

LEARN MORE WITH VIDEO TUTORIALS

Forget tedious help engines or paper manuals! You can now access a wide range of "help" product documentation in the form of a series of video demonstrations directly on dartfish.tv. Whether

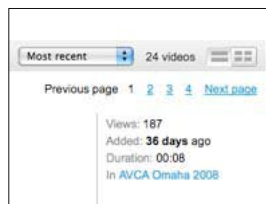

you are new to dartfish.tv or an experienced publisher, these new tutorial videos will help you understand what dartfish.tv offers and learn exactly how you can get the best from it, ranging from an overview of key features and functions of dartfish.tv to managing content, uploading video from Dartfish tagging, and more...

ENHANCED PERFORMANCES

Save time, experience faster response times on dartfish.tv! Dartfish.tv has been migrated to more powerful servers to guarantee an even more optimal performance of the site to accommodate an increasing number of users.

BETTER USABILITY FEATURES

- **List view:** you now have the option to arrange your videos in a "tile" or "list" view. The latter provides more information on the video so that you can rapidly select the video you want to view.

- **Sort your content:** decide the order in which your videos are listed according to the following criteria: most viewed, most recent, ascending or descending alphabetical order.

in which your videos are listed according to the following criteria: most viewed, most recent, ascending or descending alphabetical order.

- **See what content your visitors like the most:** the number of views is displayed next to every video item.

- **Restrict access to your channel to your members only:** in this case, your channel can be hidden from the portal pages so that access is only granted to the group of your choice via a direct URL.

PUBLISH FROM THE NEW DARTFISH 5.0

You can now publish your videos enhanced with any version of Dartfish 5.0 directly on the dartfish.tv video casting platform that you have the rights to access! Upload straight from Dartfish software in just a few steps. Extend sharing and experience the benefits of unique visual technology now.

A MULTILINGUAL SITE

Dartfish.tv is now available in German, as well as English and French. Further languages will be added in response to a growing community of users from countries throughout the world.

IMPROVED SUBSCRIBER MANAGEMENT

Manage your subscribers across the collections of your channel. You can now easily add an existing subscriber to other collections or change their existing subscriptions in just a few clicks. Go to the "Manage subscribers" page, click on a subscriber and check out these new functions on the new "subscriber" page. Subscribing one of your members to multiple collections now only takes one unit of your allocated subscribers quota.
