Solutions dedicated to soccer/football game analysis

Technical specifications

- 01** Apps can be installed on 2 mobile devices and 2 desktops, managed via your myDartfish account
- 02** 50 GB of cloud storage to back-up your data and free-up space on your devices
- 03** Work offline and sync data when connected to the Internet
- 04** Capture using your device's camera
- 05** Import from your camera roll or from other apps
- 06** AVI, DV, MPEG-2, MPEG-4, VOB, M-JPEG
- 07** AVCHD camcorders, DV/HDV, camcorders, hard disk/memory camcorders, photo cameras, webcams, network path, etc...
- 08** Support professional video feeds (SDI, HDMI) via BlackMagic Pro Recorder* or AVermedia LGP* converters *
(* device sold separately)
- 09** Wide range of camera brands supported: Bosch, Axis, Dahua, Lilin, PTZ Optics
- 10** Encode video during capture
- 11** Replay video even while recording is in progress
- 12** Automatically creates a single video when long recordings are saved as multiple files by the camera
- 13** Hides or removes unwanted footage at the beginning or end of video
- 14** Freehand, line, circle, rectangle, arrow
- 15** Selectively add events to montage and create your game highlights
- 16** Change duration of events, re-order them and add drawings to make the perfect highlights
- 17** Bookmark moments of special interest within events. Annotate and draw on them. Share with video and events
- 18** Bring many videos into a single project
- 19** Identify the keywords needed to breakdown your games and assign them to buttons (* denotes use of Dartfish Note App only)
- 20** Define teams and squads and show buttons and lists of rostered players. Player selection can even be changed during the game
- 21** Use group boxes and tabs to define your own screen layout for efficient tagging
- 22** Use myDartfish Note (iOS, Android) or On-Field (Windows) for full-throttle tagging without video
- 23** Conveniently use a mobile device to tag live during the game then match events to video afterwards
- 24** Import events captured by 3rd party apps and easily merge them to the video
- 25** Capture and tag the video as the game unfolds
- 26** Identify where the action took place on the field by recording coordinates and named zones
- 27** Use button clicks to activate other buttons or panel pages: Make tagging efficient by multi-tagging events in a single click and make the best use of screen space
- 28** Select IP camera preset views from the tagging panel
- 29** Change keyword tags (Live S and Pro S only), modify In and Out Point, add description
- 30** Search events by keyword, name and description
- 31** Clicking the headings and numbers from reports reveals relevant video
- 32** Summarize frequency and duration data in stats tables and graphs
- 33** Export events and keywords to CSV for statistical analysis in 3rd party software
- 34** Copy tables, graphs and images to documents and presentations
